<https://www.seeger-ruschredangus.com>

Follow us on Facebook @ Seeger & Rusch Red Angus!

Red Angus have been recognized over time to yield low-maintenance, easy-calving cattle with high fertility bloodlines. The Red Angus females are known for superb reproductive abilities, milk production, maternal instinct and longevity within the herd. Take a look at some of the dams' ages producing these bull calves! These cattle are also known for moderate size, good disposition, and carcass quality with increased intramuscular marbling. Over the years, these outstanding qualities have created a high demand market for the Red Angus breed. Their natural assets, combined with pedigree selection, have allowed us to balance our herd with genetics that are proven for success. Our goal is to provide reputable bloodlines that help you profit, while progressing your herd in a positive direction.

Our Red Angus bulls have great, gentle dispositions that stem from excellent maternal lineages and strong, established sire pedigrees. These bulls are very easy to work with. Depending on your goals, look through and select a bull that will supplement your herd accordingly. Some of our bulls provide better calving ease, which is excellent for first calf heifers. Others yield offspring with better cow herd building traits, growth, and carcass traits.

During early breeding season, we select top semen for AI with the goal of improving reproductive performance and genetic quality of our livestock. We follow that up with our reliable herd bulls to guarantee a successful breeding season. Our bulls will be semen tested prior to pick-up or delivery. It brings us great pleasure to offer these bulls for sale private treaty. Come take a look!

RED ANGUS GUIDE TO EPDS

Retrieved From RedAngus.org

ProS ... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in the index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born.

HB ... Herdbuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include CED, CEM, WW, MILK, Mature Weight, Heifer Pregnancy and Stayability.

GM ... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include ADG, CW, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area.

CED ... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams.

BW ... Birth Weight predicts differences in actual birth weight of progeny.

WW ... Weaning Weight predicts differences in 205-day weaning weight.

YW ... Yearling Weight predicts differences in 365-day yearling weight.

ADG ... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age.

MILK (MLK) ... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters.

CEM ... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers.

STAY ... Stayability predicts differences in the ability of an animal's retained daughters to remain productive in the herd - calve every year - through 6 years of age.

MARB (MB) ... Marbling predicts differences in marbling score - amount of intramuscular fat measured at the 13th rib.

YG ... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA, and Fat.

CW ... Carcass Weight predicts differences in actual hot carcass weight.

REA ... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib.

FAT ... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs.

FOR THE LOVE OF RED COWS ...

Seeger Red Angus Ranch was started in the early 1990s by Sherill Seeger and family. From the beginning, we have worked hard to breed with excellent genetics incorporated into our herd. To this day, you can find Seeger lineage in sale catalogs across the country. In 2003, we downsized and kept a small Red Angus herd to keep Sherill busy while daughter, Dixie, attended veterinary school. After her graduation, we began growing the registered herd back up. We are back to selling registered Red Angus bulls and a few heifers private treaty.

Dixie married Brandon Rusch, thus creating Seeger & Rusch Red Angus. They moved onto the farm & ranch and have since had kids, Regan, Jolyn and Kenna. The kids have displayed their love for cattle from a young age and love feeding cows with dad in the tractor. Although Sherill has retired, he helps out, especially during calving season, when not traveling and hunting!

Our calving season runs from February through March. The cow/calf pairs then enjoy summer pastures until being brought home in the fall. They are not creep fed. After weaning, the bulls are taken to a feed lot for supplementation and preparation for sale. At the lot, bulls are expected to gain 3 lbs per day on a combination of rolled corn, silage and barley hay. Our bulls are bred for better success, longevity, and have gentle dispositions, making them excellent for servicing herds for years to come.

We feel very blessed to be in the registered Red Angus business and are passionate about the quality of our herd. We would like to thank family, friends, and our loyal customers who help make our business successful and allow us to keep doing what we love!

Sherill & Kim Seeger

Brandon, Dixie, Regan, Jolyn & Kenna Rusch
